

Goodbye to mud

MUCKY boots leaving a trail of mud on car floors and kitchen carpets are an occupational hazard for horse owners.

Horse dad James Koumis suffered as much as anyone – so he decided to invent a solution.

The Aquabrush is portable, easy to clean, eco-friendly, reusable and needs no power source.

It comprises a set of double action bristles fitted with a 'pop up action' nozzle. When opened, the nozzle allows a jet of water to flow out from the bottle. It's closed off again by clicking the nozzle back down.

The brush is made in the UK, just outside Luton. All you need to add is water.

James says it works as well on the family pony's hooves as his walking boots and daughter's wellies.

The Aquabrush can also be used for cleaning bikes, sports kit and spot cleaning carpets. It comes in four different vibrant colours with a bag and micro cloth.
